# Advanced Collision Investigation

## March 19 - 30, 2018

This **80 hour course** is the **pre-requisite** to **Collision RECONstruction**.

Advanced Collision Investigation includes a math refresher along with in-depth studies of the concepts of vehicle dynamics and motion in collision investigation.

Instruction topics include: **Linear Momentum, Scene Diagramming, Airborne formulas, Time & Distance studies, Center of Mass, Kinetic Energy, Principle Direction Of Force and Delta V**

There is field work in this course. Students should come to class dressed appropriately for the weather.

Required equipment: **Scientific calculator & Laptop**

**Tuition cost \$ 850.00\***

**\* \$150.00 DISCOUNT  
for first 10 registrants  
Class Limit 25 students**

Taught by **Tim Lovett** & Crash Dynamics staff
