Hurst TX 76054**

January 19–20, 2018

Class hours 0800–1700 on January 19

Class hours 1400–2300 on January 20

Basic Forensic Photography

This course will teach the collision scene investigator basic skills needed to document a collision scene in both daylight and lowlight conditions.

- * **Day 1 of this course will focus on daylight shooting**
- * **Day 2 of this course will focus on night shooting**

Our instructors are **Mark Porter**, Tarrant County DA's office, and professional photographer **Rob Robinson**. They will provide insights on what elements to look for while working a collision that will effectively chronicle the scene and offer a photographic record in support of scene diagrams and reconstruction!

Course studies include: **Basic DSLR camera operation**
Camera modes (auto, shutter, priority, etc)
Use of various camera equipment
Techniques to overcome poor light conditions
Photography of metallic & contrasting objects
"Funnel effect" scene photos

Supplies list: **DSLR (Digital Single Lens Reflex) Camera** - required
Camera Owner's manual - required
Detachable Flash - preferred
Camera Tripod - preferred
